## Air source model makes installation easy

An MGS approved plug-and-play air source heat pump has been launched by Stiebel Eltron. Offering heating, domestic hot water, cooling functions and a 175-litre domestic hot water cylinder, the WPL.ACS is an easy-to-fit outdoor unit with a minimal footprint and extremely quiet operation.

Electrical and plumbing connections are made through the base, and the WPL.ACS unit also comes with an electronic expansion valve to ensure optimum control

of all internal processes. The unit operates between -20°C and 30°C, and also offers a cooling option.

## Dirt doesn't stand a chance

When it comes to cleaning up the muck, Big Wipes has it covered. In response to customer feedback, the company has launched the Power Spray and the Power Gel to augment its grime-fighting arsenal.

Big Wipes cut through anything from diesel, heavy grease and oil-based paints to stubborn PU expanding

foams and adhesives, silicone sealants and epoxy grouts. Industrial Power Spray can be sprayed onto surfaces or tools for that extra power kick before using a Big Wipes wipe. It can also be used to re-load wipes with the Big Wipes formula, making them last longer. The spray can be used for hazardous and non-hazardous waste and

works with all 'blue roll' options. All Big Wipes products, except the Power Gel, contain a fully biodegradable cleaning formula with anti-bacterial properties and aloe vera and vitamin E. All products comply with the latest EU Cosmetics Standards.

## Updated look for simple selection

The packaging on the 'F' range of chemical water treatments from Fernox has been updated with more detailed information on the benefits of each product. Furthermore, an interactive QR barcode has been added to enable smart phone users to access specific information and video clips on how to use the products.

While the formulations remain the same, the packaging incorporates larger, user-friendly labels that describe the application

and performance advantages of each product in the 'F' range. The addition of the QR barcode on the label is aimed at first time users who would like visual demonstrations of how to use the product step-by-step and hear best practice advice and guidance.

The updated products within the Fernox 'F' range include: Protector F1, Boiler Noise Silencer F2, Cleaner F3, Leak Sealer F4, Powerflushing Cleaner F5 and Energy Saver F6.
