Conex Bänninger pushes the boundary with an innovative new range

The >B< Push range from Conex Bänninger is a quick and easy to fit flame free fitting with an installation time of a few seconds. With its demounting capability, it can be re-used up to 20 times on copper tubes. Thanks to the innovative one push fits all system, it is perfect for most retro-fit applications.

Manufactured with a corrosion resistant low-lead DZR body that comes with a 25-year warranty, means that all the fittings are compatible with various tube types, including copper, PE-X and PB.

The products' flexibility will require installers to carry one type of fitting and vastly reduce up-front inventory expenditure. >B< Push fittings are type tested hydrostatically up to 40bar and pneumatically up to 6bar. The products are all manufactured from recyclable material enabling them to be recycled at the end of their life, supporting industry sustainability.

Fernox filter fluid provides maximum protection

The latest innovation from Fernox is a chemical water treatment, which enhances the performance of any system filter by offering maximum protection against the damage caused by sludge and circulating debris.

Fernox Filter Fluid+ Protector combines an active dispersant with the proven effectiveness of the market leading inhibitor, Fernox Protector F1, which prevents further corrosion and scale formation. What makes this product different is the inclusion of a dispersant that is formulated to detect, lift and deliver sludge and debris to a system filter for safe removal.

This integrated approach can help reduce installer time spent on-site during the cleaning process and can also prove invaluable for heating systems that need to operate around the clock by avoiding critical downtime.

Fernox Filter Fluid+ Protector is available in 500ml and 20 litre bottles and should be left permanently within a central heating system to enhance the cleaning process by removing any residual debris.

Big Wipes keep you grime free

Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing special 'power scrub' granules, which means the Power Gel can remove deeply ingrained dirt and grime 100% faster than smooth gels.

While Big Wipes hand cleaning wipes are perfect for mopping up muck on the go and when water is not available, Big Wipes Power Gel is ideal for an end-of-day deep clean. Simply rub the Power Gel into your hands and let the power granules do their work, then rinse with water and dry your hands. Just a small amount of the Power Gel can easily remove uncured paint (oil, water and hammer finish), adhesives (including adhesive and tape deposits), silicone, epoxy, PU foam, oil, grease and much more from the skin.

The fresh citrus scent means hands smell good too, which is important for those tradespeople who, for instance, have to eat lunch on site or meet customers after handling materials.

CK Magma scores a hat-trick

Carl Kammerling International has introduced the new C.K Magma three in one Tote.

Folding flat when not in use, makes it ideal for storage in a fully loaded van. When erect the Tote offers safe and versatile transportation for a wide range of tools. A deep 11 inch cavity teamed with ten inch width and external pockets add to its versatility and convenience as a conventional tote. With the nine section internal divider, the Tote offers safe and convenient storage of silicone, glue and mastic cartridges as well as the sealant gun itself.

Constructed of a durable 600 denier polyester to protect against wear and tear, this reliable Tote also features an internal wipe clean, removable base.

Providing maximum comfort in use, the Tote benefits from a convenient shoulder strap for ease when transporting heavy tools and equipment with carry handles as an alternative option.

Thision S Plus boiler from Elco

Elco has launched the Thision S Plus range of highly efficient and technologically advanced boilers. The completely new unit offers extremely low NOx and carbon dioxide emissions.

Thision S Plus is available in three models: 34kW, 45kW and 53kW - each of which has a class-leading A/A+ energy efficiency rating, making them perfect for a variety of new and replacement projects.

The compact units (measuring 680mm (h) x 385mm (d) with widths between 500mm and 660mm) have been designed for simple installation and maintenance, with the control board mounted on a hinge-open enclosure.

The Thision S Plus also features a highly advanced heat exchanger configuration, which ensures continuous automatic de-aeration. The low turndown ratio makes the Thision S Plus ideal for modern, well insulated buildings, where the heating demand is low throughout the year.
