

## So powerful, they need a cage

The new Big Wipes Cage holds any Big Wipes 80s tub, the one litre Big Wipes Power Spray and the one litre Big Wipes Power Gel firmly and securely. It fixes easily into ply panelling or into a bespoke racking system in vans and is wall

mountable for the workshop, or near the sink for the Power Gel. Made from tough high quality

polycarbonate, the Cage comes with

pre-drilled holes for screw fixing. Once installed, the cage allows Big Wipes 4x4, Power Spray and Power Gel to be accessed with just one hand for those very messy jobs. Big Wipes 4x4 wipes and Power Spray contain four powerful cleaning agents and four dermatologically tested skin conditioners to quickly shift all modern construction sealants, adhesives, paints, coatings and grime in an instant. ## Put an end to 'pressing' jobs

As the rise of more modern jointing techniques, such as push and press, continues, Pegler Yorkshire, has launched a combined toolkit that gives installers the right equipment to speed up installations.

The Pegler Yorkshire Toolkit includes everything an installer needs for a push or press system installation; a REMS 3-35mm pipe cutter suitable for Copper, Carbon and Stainless, 15, 22 and 28mm Jaws, 15-108mm XPress Copper Depth Gauge, Tectite Sprint and Tectite Classic Depth Gauge and Deburrer, 15mm Multi-layer Tube Straightener and ten-28mm tube cutter for use with PEX and Multi-layer tube. In addition, there are demount clips, mini press tool, spare battery and dri-slide. [www.pegleryorkshire.co.uk](http://www.pegleryorkshire.co.uk)

## Hamworthy's stainless steel family is growing

The new Stratton mk2 wall hung boiler is the smallest output in the Hamworthy stainless steel family and a great match for restricted space plantrooms. The robust qualities of stainless steel make it very tolerant of older heating circuits and resistant to corrosion for easy maintenance and a long life. Higher efficiency and an increased range of outputs between 40 and 120kW enables closer load matching for energy saving. Plus a five-year warranty on the heat exchanger gives long-term peace of

mind. The boiler has been designed to assist customers in refurbishment projects and can operate on LPG and natural gas, making it suitable for a multitude of commercial applications. Open flue and room sealed flue options are available. [www.hamworthy-heating.com](http://www.hamworthy-heating.com)

## BoilerMag enhances industrial boiler filter

BoilerMag has enhanced the BoilerMag XT industrial boiler filter to include an automatic air vent, which will greatly reduce the potentially damaging effects of air accumulating in a heating system. Air facilitates the process of oxidation, which, in turn, causes corrosion; a common cause of cold spots in radiators, circulation problems, and system inefficiency.

While manual venting is commonplace, it relies on the service engineer to release air that could have been in the system for months, risking the build-up of corrosion. This useful product development to BoilerMag's industrial heating system filter enables the filter to be used as an air release point. It will, therefore, be of particular use to maintenance engineers and property owners, enabling them to ensure that heating systems are kept air free. The fitting of the automatic air vent also enables the XT range to satisfy specification requests for 'air and dirt' separator requests. [www.boilermag.com](http://www.boilermag.com)
